Illinois Community College Board

# Q. FISCAL YEAR 1989 DISADVANTAGED STUDENT GRANT REPORT

DEPOSITORY,

November 1989

## MESSAGE FROM THE EXECUTIVE DIRECTOR

The community colleges' mission to serve all students creates challenges in meeting students' diverse educational needs. One way such diversity is addressed is through disadvantaged student grants, which fund special or supplemental services for students who are economically, socially, or culturally disadvantaged.

Some students who lack basic skills find it extremely difficult to attend and succeed in college without special assistance. For these students, community college districts offer such support services as testing/assessment, tutoring, counseling, referrals to external agencies, readers and notetakers for the visually impaired, interpreters for the hearing impaired, and assistance for the mobility impaired. Special projects and services are also designed to reach displaced workers, single parents, women returning to the workforce, minorities, and illiterate adults. Remedial and adult education courses provide the academic skills needed to correct educational deficiencies.

In support of the open access philosophy of community colleges, disadvantaged student grants help ensure that all students, regardless of race, age, ethnic origin, economic status, academic preparation, or physical disability, may pursue a college education. Disadvantaged student grants are a small but critical part of the community college budget. These funds enable colleges to provide special support services for the many community college students with special needs.

David R. Pierce  
Executive Director

## HIGHLIGHTS

UNIVERSITY OF ILLINOIS  
AT URBANA-CHAMPAIGN

The \$7,993,000 of disadvantaged student grants allocated to the community colleges during fiscal year 1989 have had a significant impact upon assisting disadvantaged students to attend and succeed in college. A summary of the special services provided with these funds is shown below:

- . Community colleges provided 1,075,752 contact hours of special support services to 308,655 students, reflecting an 11.2 percent increase in the number of students served over the previous year. Shown below are the types of services offered and the number of students served:
  - Educational/career counseling: 99,111 students
  - Tutoring: 94,412 students
  - Testing/assessment: 80,710 students
  - Outreach services: 18,677
  - Other direct support services: 6,814 students
  - Referrals to external agencies: 6,672 students
  - Services for disabled: 2,259
- . Special programs designed for specific special populations and funded through the disadvantaged student grants served over 37,500 students. This included special minority programs which reached 7,713 minority students.
- . 69,879 students received instruction in adult basic and adult secondary education, English as a Second Language, and remedial courses, generating over 23 percent more credit hours than in fiscal year 1988.

Disadvantaged student grants have provided specialized services to substantial numbers of economically/academically disadvantaged and physically disabled students, assisting them in attending and succeeding in college.

## DISADVANTAGED STUDENT GRANTS

The Illinois Community College Board distributes disadvantaged student grants to Illinois public community colleges to provide funding specifically for services and instruction that assist educationally and socially disadvantaged and handicapped students to enable them to attend and succeed in college. In fiscal year 1989, disadvantaged student grants totaling \$7,933,000 were distributed to all community college districts (except State Community College, which is funded on a different basis), with each district receiving a flat \$20,000 per college plus a formula allocation based on student credit hour enrollments in remedial, adult basic education, and adult secondary education courses. Individual grants ranged in size from approximately \$32,000 to \$5 million, with a median of \$63,000. These funds may be spent for support services, adult and remedial courses, and special programs such as literacy development and minority support. A review of these activities and expenditures is presented in the following sections.

### Support Services Provided

Services provided through disadvantaged student grants include tutoring, educational and career counseling, testing/assessment, referrals to external agencies, outreach services, and other direct support services, e.g., readers for the blind and notetakers/interpreters for the deaf. These services, targeted for a special population, are designed to assist students in achieving their educational objectives. Table 1 summarizes the total students served and contact hours used for support services through disadvantaged student grants in fiscal year 1989. The 308,655 students who received support services in fiscal year 1989 (duplicated count) represent an increase of 31,143 students served from fiscal year 1988.

Of the 38 participating community college districts, 36 districts used disadvantaged student grants to provide tutoring, 27 districts provided educational and career counseling, 31 districts used funds for testing/assessment, 24 districts provided referrals to external agencies, 27 districts used funds to provide services for disabled students (such as readers and notetakers for the visually impaired, interpreters for the hearing impaired, assistance for the mobility impaired), 17 districts provided outreach services, and five districts funded other direct support services such as study skills and retention

programs designed for disadvantaged students.

Of all the support services provided through the fiscal year 1989 grant, educational and career counseling showed the highest number of students served (99,111), providing a total of 167,737 contact hours. The second highest service was tutoring, serving 94,412 students for a total of 595,002 contact hours, or an average of 6.3 contact hours per student. Testing and assessment was the third highest service in the number of students served (80,710), producing a total of 135,011 contact hours.

Other Direct Support Services	5	<u>6,814</u>	<u>12,909</u>
TOTALS		308,655	1,075,752

\*Unduplicated by service provided.

Increase in Support Services

Table 2 compares the number of students who have received support services from fiscal year 1988 to fiscal year 1989. The total number of students served increased by 11.2 percent (duplicated headcount), but the total contact hours utilized for support services decreased by 11.2 percent over the past year.

Table 2

COMPARISON OF THE NUMBER OF STUDENTS SERVED AND CONTACT HOURS PROVIDED  
BY SUPPORT SERVICES THROUGH DISADVANTAGED STUDENT GRANTS BETWEEN FISCAL YEARS 1988 AND 1989

<u>Support Services</u>	<u>Students*</u>				<u>Contact Hours*</u>			
	<u>FY 1988</u>	<u>FY 1989</u>	<u>Number Change</u>	<u>Percent Change</u>	<u>FY 1988</u>	<u>FY 1989</u>	<u>Number Change</u>	<u>Percent Change</u>

\*Unduplicated by service provided

Educational and career counseling services increased by 43.3 percent for students served, but decreased by 9.4 percent in the total contact hours provided from 1988 to 1989.

Referrals to external agencies increased both in the number of students served by 14.9 percent and in the total contact hours provided by 30.9 percent from 1988 to 1989. Tutoring also showed an increase in the number of students served (7.8 percent), but a decrease in the contact hours by the same percentage.

Testing and assessment services decreased by 5.8 percent in the number of students served and decreased 22.3 percent in the total contact hours provided. Likewise, both the number of students served and contact hours provided for other direct support services decreased by 5.2 percent and 15 percent, respectively, from fiscal year 1988 to 1989. For comparison with the past year in Table 2, other direct support services included the services for disabled and outreach services.

Tables A-1 and A-2 in the Appendix show the total students served and contact hours provided in support services by each college district.

### Special Programs

In addition to providing services and courses, disadvantaged student grant funds may also be used to support special programs designed specifically to assist minority or special populations to initiate, continue, or resume their education. Eighteen districts cumulatively reported 56 special programs which were funded totally or partially by disadvantaged student grants. Table A-3 in the Appendix shows the number of special programs, number of students served and total amount of funding from disadvantaged student grants for fiscal year 1989. Over 37,500 students were served by special programs funded by the disadvantaged student grants. Community colleges reported special programs for literacy development, minorities, retention, parenting, outreach, recruitment, high school dropouts, enrichment, special needs, and others.

Table A-4 in the Appendix shows the number of special programs funded by sources other than the disadvantaged student grants as reported by the college districts.

### Special Minority Programs

Twelve community college districts reported using disadvantaged student grants for special programs especially for minority students, three less than last year. As shown in Table 3, the twelve districts cumulatively served 7,713 students in fiscal year 1989 through special minority programs. By racial/ethnic groups, the greatest number of students served through special minority programs funded with disadvantaged student grants were 3,883 Black students and 2,058 Hispanic students.

Table 3

STUDENTS SERVED THROUGH SPECIAL MINORITY PROGRAMS  
FUNDED TOTALLY OR PARTIALLY BY DISADVANTAGED STUDENT GRANTS  
IN TWELVE COMMUNITY COLLEGE DISTRICTS

<u>Minority Group</u>	<u>Number of Students*</u>
American Indian	146
Asian/Pacific Islander	716
Black	3,883
Hispanic	2,058
Other	<u>910</u>
TOTAL	7,713
*Unduplicated by service provided	

### Other Special Programs

Two community college districts reported three additional special minority programs, not funded by the disadvantaged student grant funds, which served cumulatively 13,608 students during fiscal year 1989. Table A-4 in the Appendix shows other special programs, funded by sources other than the disadvantaged student grant, available to special populations during fiscal year 1989. Those 43 special programs served 34,567 students in 13 college districts.

ABE, ASE, English as a Second Language, and Remedial Courses

Disadvantaged student grants help colleges support adult basic education (ABE), adult secondary education (ASE), English as a Second Language (ESL), and remedial courses. The educational activities described in this section reflect only a portion of the total adult and remedial courses offered on community college campuses. Table 5 reflects the course offerings in these categories from fiscal year 1986 through 1989. The number of students served and the credit hours generated in these courses over a four-year period has increased considerably. The total students served and credit hours generated by these courses by each community college district are given in Table A-5 in the Appendix.

Over 69,800 students (duplicated count) attended classes funded with disadvantaged student grants in fiscal year 1989. This number represents a substantial increase of 35.6 percent in the number of students served from the year before, and an increase of 48.2 percent in the number of students served since fiscal year 1986.

Over the past year, the ESL enrollments increased by 103.5 percent, remedial enrollments increased by 84.2 percent, and ASE and ABE enrollments increased by 24.3 percent and 4.2 percent, respectively.

The total credit hours generated by these courses also increased substantially by 23.8 percent from 1988 and by 47.6 percent since fiscal year 1986. The greatest increase in the number of credit hours generated over the past year was in ESL with over 102 percent, while the number of credit hours also increased in remedial by 98.5 percent. The number of credit hours in ASE increased by 34.7 percent; however, ABE credit hours showed a slight decline of less than one percent from the past year.

Table 4

COMPARISON OF COURSES SUPPORTED THROUGH DISADVANTAGED STUDENT GRANTS  
IN FISCAL YEARS 1986 THROUGH 1989

### Unaudited Expenditures

Table 5 represents the unaudited expenditures of disadvantaged student grants for fiscal year 1989. (Unaudited expenditures are year-end estimates reported by the community college districts prior to annual audits.) Salaries and benefits comprised over 76 percent of the total expenditures for these funds, a seven percent increase over fiscal year 1988. The second highest cost is in administration, which constituted 12.3 percent of the total cost, well under the 30 percent maximum allowed for administrative costs. Items under the administrative category include administrative and office staff salaries and costs for office equipment, utilities, and rental of facilities. Table A-6 in the Appendix shows the total unaudited expenditures by each community college district.

Table 5

#### UNAUDITED EXPENDITURES OF DISADVANTAGED STUDENT GRANTS FOR FISCAL YEAR 1989

<u>Expenditure Category</u>	<u>Dollars</u>	<u>Percent</u>
Salaries and Benefits	\$6,110,832	76.9%
Instructional Materials	720,067	9.1

Consultants	19,322	.2
Administration	<u>977,473</u>	<u>12.3</u>
TOTAL EXPENDITURES	\$7,943,163*	100.0%
TOTAL ALLOCATION	\$7,933,000	
*Includes local funds		

### Conclusions

Disadvantaged student grants have enabled community colleges to provide educational activities and services for disadvantaged students wishing to pursue a college education. During fiscal year 1989, community colleges served 308,655 students through 1,075,752 contact service hours, representing an increase over fiscal year 1988 in students served by 11.2 percent. Over 37,500 students were served through special programs funded by disadvantaged student grants. Within those 56 special programs, 7,713 students were served in special minority programs. Disadvantaged student grants clearly make a significant contribution in assisting disadvantaged students to get the support they need through tutoring, counseling, testing and evaluation, referrals to other agencies, and other direct support services to pursue and succeed in college.

Disadvantaged student grants have helped colleges meet the challenge of serving the diverse and special needs of their students. As demographic changes occur in the state with the increase of minority and disadvantaged populations, community colleges must be prepared for increasing challenges of reaching out and serving this growing population. As a result, the need for special programs for minority students and support services for disadvantaged students will continue to increase substantially to enable these individuals to enroll and succeed in college.
